

## MacSvcOS

*10.7 Lion Service Training 2 days*

Crywolf is proud to offer the 10.7 Lion Service Training course. This is one of two required courses to gain your ACMT certification.

### ***The 2 Day Course includes:***

- Hands on Installation
- Time Machine setup and Troubleshooting
- Troubleshooting Preferences
- Practice Mac OS X v10.7 Lion troubleshooting scenarios, and More!

### **We keep the class size small – a maximum of 8 students.**

On the last day of class, we invite the students to take the 10.7 Troubleshooting exam for only \$100 -- that's 33% off the regular price. This is an intermediate level course. Some experience with the Mac OS and prior hardware service is a plus.

This course is for anyone interested in becoming an ACMT Technician. This is an excellent opportunity for institutions that are interested in becoming a Self Servicing Provider. For current Self Servicing Providers it is an opportunity to add additional Certified Technicians. It is also for technicians who work for, or are thinking of working for, an Apple Authorized Service Provider.

The cost for the course is \$1000 and includes the Training Manual. We also offer to proctor the 10.7 Troubleshooting exam on the last day of the course. Proctored exams are \$100 each (normally \$150; 2 are required).

***Seattle • Portland • San Diego • Boston***
