

Custom On Site Apple Certified Macintosh Technician Training

If you are a company or institution that would like to get a group of technicians certified, we can come to you for training.

The 7 Day onsite Course includes:

- 10.7 Lion Service Training
- ACMT Service Training
- Take apart equipment
- Certified Hardware trainer
- Textbooks and Workbooks
- Exam Proctoring at your facility
- Other Apple Courses are also available!

Getting a group of technicians certified can be a nightmare. Often it means paying tuition for each student, plus travel, food and lodging, expenses, etc. By hosting a training session at your facility you will get a great group rate, as well as saving all of the cost associated with sending a technician to training. You provide the facilities, we provide the rest. This is an excellent opportunity for institutions that are interested in becoming a Self Servicing Provider. For current Self Servicing Providers it is an opportunity to add additional Certified Technicians to your staff.

We offer Flat rate pricing as well as Tiered pricing, and discounts for multiple sessions. We will work with you to customize your training package.
